WE HAVE MET THE ENEMY AND THEY IS US (W Kelly)

Pay PWM/Media no heed: Communism is not dead. Communism conceived has a long way to go to draw breath. Anti-Communism is that corpus delicti unable to respond to manifestations Lazarus.

PWM/Media's target never was Communism/Utopia. A paper-tiger communism was hoisted to terrorize the ignorant and elect continuance Inside the Beltway. When Communist Party Soviet Union, CPSU, bellied-up, PWM/Media rushed in ahead of the angels to claim the scalp.

Communism was not destroyed by Capitalism per se. CPSU, flying the banner of Socialism USSR, the epitome of State Capitalism, ran afoul of 1) Glasnost and 2)Greed, that capitalism inherent in every human soul. State Capitalism's socialist top-down government OF the people, the required first step down the road to Communism FOR the people, never achieved governance BY the people .... and the State shall witheraway .... (V I Lenin)

One social experiment missing the road to Utopia does not kill Communism. Nor will the other social experiment, Capitalism rampant on a field of corruption, kill Democracy. Only fools believe Communism and/or Democracy are dead.

Far from it: .... we must oppose the logic of confrontation with the logic of understanding .... (MSG, Paris, '85)

Autonomy and Self-Government, Anarchy, Libertarianism, Communism, Democracy, Communalism, you name it, is flourishing in every nook and cranny of the neighborhood we all call Earth.

The Authotitarianism of CPSU and Anti-Communism US, on a decline since Magna Carta, has once again partaken of the dust. This is cause for dancing in the streets as Arbitration becomes the Way of Life and Change breaks the chains of stultification.

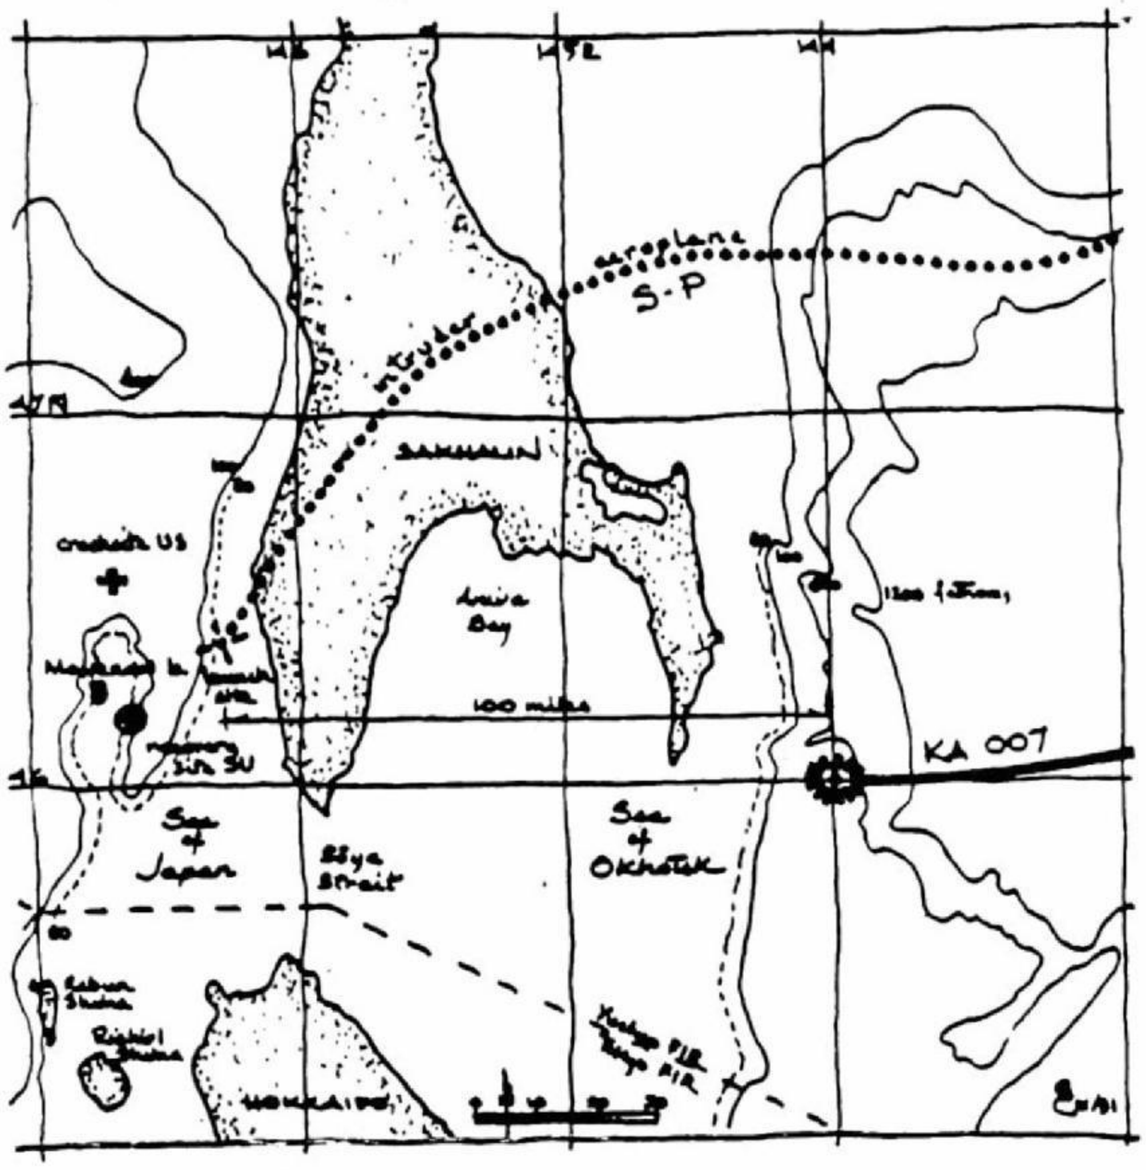
SHOOTDOWN out of EXPLOSION by ? GUESSWHO?

Eight years and more ago, come the first of September, Flight 7, Korean Airlines was missing for 20 1/2 hours before the US State Dept accused the Soviet Union of shooting it down into the Sea of Japan and killing 269 innocent persons. "The rest is history".



✚ : US state Dept's estimated position from NYTimes diagrams

⊕ : Soviet Union's estimated recovery site position from Izvestyia's 1991 articles

✺ : 46N x 144E : latest estimated position ...now 75 miles west of Fig 42, p 239 in 2nd ed. EXPL 007

Someone is pulling your collective leg and pulling wool over your spectacles and it is not G K G .

Figure 1

Only one book locates the remains in other than the Sea of Japan. EXPLO 007's first edition, concurring with L F Prouty's Gallery Magazine article, found them down 6,000 fathoms in the Pacific Ocean's Kurile Trench. (see under 015's position in Figure 4)

The second edition moved them out of the trench and the Pacific, implying no disrespect for LFP, into the Sea of Okhotsk, because 007's debris washed up on that sea's shores.

When you have eliminated the impossible .....

1) Shot down into the Sea of Japan, KA 007 disappears for 9 days.
2) Shot down into the Sea of Japan, KA 007's debris washes up on Sea of Okhotsk beaches, 200 miles east.
3) Shot down by a fighter ("the target is destroyed"), KA 007 flies away in the direction of the Sea of Japan.
4) KA 015's pilot could not find KA 007 on course R-20

Whatever remains, no matter how improbable, must be the truth.

5) KA 007 was not on course R-20
6) KA 007 was not the fighter's target
7) KA 007 was not shot down into the Sea of Japan
8) KA 007 was not shot down
9) KA 007 was destroyed over the Sea of Okhotsk

GKG-4 -- X/91

SHOOTDOWN out of EXPLOSION by ? NSC ?

Figure 2 : c 162Ø GMT
007 drifts off course northerly, enjoys a one-blip dance with an RC-135 on patrol, radios a NEEVA position thru 015 to Anchorage and initiates the Soviet's intruder aeroplane track toward Kamchatka. RC-135 flies away home to Shemya; 015 flies ATC's R-20.

Figure 3 : c 175Ø GMT
Kamchatka traversed, 007 enjoys a one-blip dance with the S-P (Stealth-Prototype) plane which, taking over the intruder aeroplane duty, flies on toward Sakhalin. 007 peels off southward; 015 flies ATC's R-20.

Figure 4 : 1827 GMT
007 curves westerly for its Sakhalin landing. Over the Sea of Japan the Soviet flighter's missile-launch is coordinated with remote detonation of the on-board device that explodes 007 over the Sea of Okhotsk. S-P flies away home to Misawa; 015 continues on ROmeo-20 to Seoul.

Whatever happened to KA 007? This MC-junket story is what (must have)happened during the four months before EXPLO. The scenario is based on facts and a reasonable assumption, often the best way to solve unsolved mysteries.

The Senator's double, K-2, explains Chappaquiddick's murder.

WHO, on top of the wall, explains Raegan's downward chest wound.

A bullet from the Bushy Knoll explains MLK's wounds better than one from the rooming house bathroom.

A rigged coding machine explains the USS Pueblo's surrender.

Sirhan killed RFK from 2" behind, standing 48" in front of him ?

Stolen software explains the US Justice Dept's "wiretap" on INSLAW.

TUM (The Umbrella Man) is the only person in Dealey Plaza who can inflict the Wound of Entry in JFK's throat at Z-188.

EXPLO 007 : Evidence of Conspiracy has a lot going for it:Enjoy.

GKG.5.. X/91

SHOOTDOWN out of EXPLOSION by ? ISA ?

In April 1983, the bomb explosion in Beirut's US embassy wiped out the CIA station there. The European and US Peace movements' success had placed deployment of the Pershings in Britain and on the Continent in more than a little jeapordy. Congressional funding of the MX was shaky and the Soviets had informed the Geneva disarmamnet talks they were preparing to withdraw from Afghanistan 1 September 1983.

These sure signs of Peace, the worst since May 1960, boded ill for the Smart-Ones responsible for keeping Cold War II alive. More's the point, they were a global threat to re-election of their Oval Office Chief in 1984. Two of the more-covert-minded set their Cray to search for postponement of the inevitable: Doomsday, sans enemy, sans war, sans profits.

Scanned into the dustbin were the more obvious gambits involving sex, crack, money and/or guns. This time the accent was to be on the unsolvable, the unthinkable. The search zero-ed in on any concoction that would cause the enemy loss of face on a scale no country's media could refuse to broadcast ad nauseum.

Coupling a live field-test of the secret Stealth gear that skewed radar lock-on and deflected missiles, to a congressional junket en route by commercial airline, K A L, to celebrate the 30th anniversary of the S Korea/US military alliance in Seoul, the Smart-Ones enlisted NSA's expertise in the Pacific's northwest sector to safely land the KAL junket on the Soviet island of Sakhalin, just north of Japan's Hokkaido. Faulty navigational gear would be the cover for a penetration that deep inside the Soviet restricted zone.

To ensure a media-event, international brouhaha, the junket would appear to have been shot at and perhaps shot down while its civilian pilot, 350 miles off course and quite lost, responded to the fighters' wiggle-waggles and tracers-as-required ordering him to land at the nearest airfield.

To accomplish this shootdown fakery, an S-P (Stealth-Prototype) plane would attract the Soviet scramblers somewhere off to the west of the junket's landing. Counting on a missile-launch as well, in the ensuing confusion no one will notice it was not the S-P pilot but KAL's civilian pilot who responds and requests permission to land safe on Sakhalin.

After faking a descent, the S-P would fly away. The fighters' deflected missiles would fall amongst the fishermen in the Sea of Japan. Radar and radio tapes would require Japanese assistance as well as NSA expertise to prepare them for the Seoul celebration and eventual home consuption.

Once the Soviets realized they had grounded a delegation of US MC's, there would be rounds of face-saving apologies laced with vodka. After a decent interval, an escort would lead the junket back onto Romeo-20 and the ministrations of the ATC (Air Traffic Control)

SHOOTDOWN out of EXPLOSION by ? NSA?

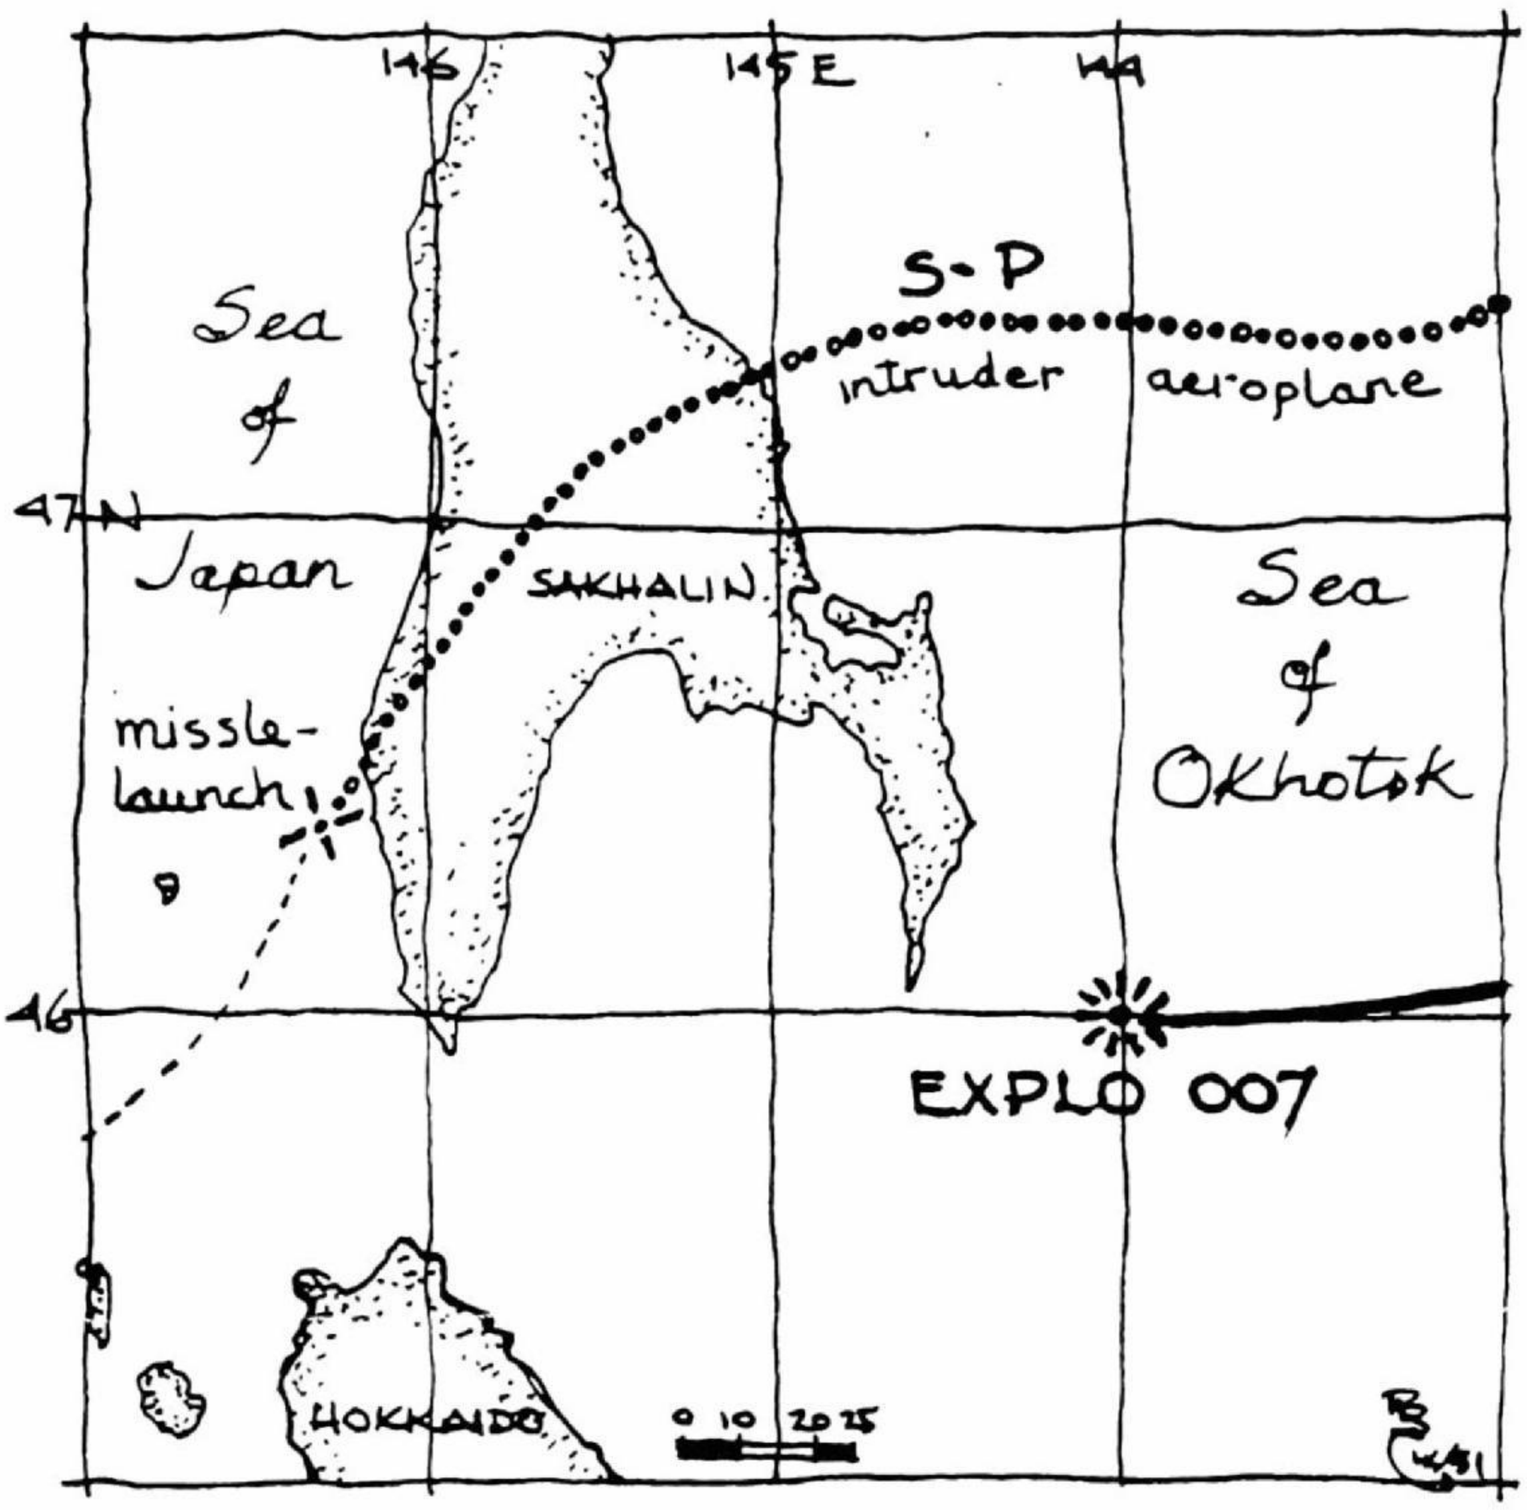

Figure 5

The Smart One's designed climax, when the photos of the fighters' attack, taken from the S-P were shown to the 30th anniversary celebration as the way the Soviets take care of strayed and helpless junketing MC's, would be a howl from Seoul heard 'round the world.

With NSA radar and radio tapes as backup, this somewhat less than civil behaviour would leave enough egg on the face of the enemy to ensure the Pershings' deployment, fund the MX, keep him tied up one more year in Kabul, avenge the CIA loss, enrapture the hearts of every anti-Communist and re-elect Chief Cold War II.

Patting the Cray for having made it next to impossible for the Soviet enemy to wiggle-waggle free of those tentacles, it was turned toward establishing an order for the military to clam-up about a flight numbered 007, a Bondian twist that was played to the hilt.

The proof of the pudding is that in eight years and more nary a canary has been seen let along heard. An astonishing fact due, of course to the Smart-Ones' junket being used as a sacrificial lamb on the altar of anti-Communism.

→

CKG·7.. X/91

SHOOTDOWN out of EXPLOSION by NSA

Remotely exploding the junket's civilian airliner, KA 007, immediately after the fighter destroyed his target, S-P, stripped the planned brouhaha naked. Enshrouding it with the aura of 269 innocent lives left the original instigators aghast and boiled in their own concoction. Today the Smart-Ones, unable to take any credit for their technical masterpiece, can only hope to constantly distance themselves from their MCs' junket by living the deep cover of Time and real double life.

Who discovered it ? Who knew how to jump it ? Who, in all that is revered in every religion, including War, could plan and execute mass human sacrifice ? To go one up on the enemy ? To keep him alive for future destruction ? To turn one more fast buck ? To be true to an idiotology ?

There is another viable military reason for this inhumanity. Stealth gear was secret and still is. To allow the enemy within spittin' distance of the stuff packed into KA 007 for its Kamchatka traverse was a risk tantamount to treason. GKG offers this as the primary cause for EXPLO 007 over the Sea of Okhotsk. The hundred-fold increase in loss of face needs no further notice.

The Smart-Ones won the Battle and lost the War. (forever)
Having found 007's remains, KGB knew CIA/NSC/ISA/NSA had once again not only thought of but also executed the unthinkable: human sacrifice to continue paper-tiger-anti-communist control of the Oval Office. Four more years of government of the people, for the warriors by the Executive Branch.

Where's the difference between the US administration responsible for continuing the Revolution of 1776 and that of the USSR responsible for continuation of the Revolution of 1917? In Washington as in Moscow it's the same insider bureaucracy, the "elite".

The good news is : Vive la Différence , GLASNOST.

The 1917's caretakers have had the gall to apply Glasnost USSR and live with its perestroika. So far, no one on this side of the Pond has any inkling what Glasnost USA is,much less what it can do.

In 1983, the Soviet Premier, finding an unsavoriness about the US enemy, brought on first by KA 007 then by Grenada, turned toward Peace and away from the arms' race and War as a way of Life. Saying nothing about KA 007, he weathered the Evil-Empire storm and brought Chief Cold War II to Iceland. There,it was tell the world where 007's remains remain or sign up as a Peacenik. He signed.

It now remains for We the People to apply Glasnost USA where it hurts. 1992 could be as Wendell Willkie said: ...buy Penn RR stock. After I'm elected so many people will be leaving Wshington that stock will have to go up....
And now abideth Capitalism, Communism and Moneyism ..and the greatest of these is Moneyism ▼
